

The Five Elements of CSR at IOT

Indian Oiltanking perceives CSR as an opportunity to invest into building bridges and goodwill with the communities we operate in. Our stakeholders in our CSR endeavours are the neighbourhood communities as the ultimate beneficiaries, and the local administration that guides us on the developmental needs of the region where we could partner within our resources, as a means to supplement administrative effort, and complement the existing amenities. The causes mentioned below have a direct bearing on the quality of life in these communities, and hence we dedicate our efforts towards these causes.
